NUMBER 1

J. C. Newman, Jr., C. A. Bigelow and **K. N. Shivakumar**	1	Three-dimensional elastic–plastic finite-element analyses of constraint variations in cracked bodies
E. Z. Wang and **N. G. Shrive**	15	On the Griffith criteria for brittle fracture in compression
K. T. Sundara Raja Iyengar, B. K. Raghuprasad, T. S. Nagaraj and **Bharti Patel**	27	Prediction of load–deflection behaviour using fracture energy G_F: a comparative study of two fracture models for concrete
B. Guha	35	Effect of specimen geometry on fatigue of welded joints
K. S. Wang and **C. M. Chu**	41	Edge crack propagation under sliding load
Chang-New Chen	57	Nonlinear fracture assessment by using the finite element method
W. Cheng and **I. Finnie**	79	Measurement of residual stress distributions near the toe of an attachment welded on a plate using the crack compliance method
Guo Wanlin	93	Elastoplastic three dimensional crack border field—I. Singular structure of the field
Guo Wanlin	105	Elastoplastic three dimensional crack border field—II. Asymptotic solution for the field
C. Sainte-Catherine, M. Di Fant, B. Duquaire and **P. Balladon**	115	Prediction of toughness scatter in heat affected zones (HAZ) with local approach
Xing Li and **Zhengxing Li**	127	Effect of a periodic elastic gasket on periodic cracks
Cai Hai-tao	133	A periodic array of cracks in an infinite anisotropic medium
J. M. Minguez and **J. Vogwell**	143	Safe life of cracked structural elements
A. Varschavsky	151	Fatigue-induced dissolution of shearable particles during subcritical crack growth
Li Changchun, Zhu Hanxing, Li Guangxia and **H. Kitagawa**	157	An investigation on the microstructural change in the propagating crack tip zone of steel
Kang Yong Lee and **Gun Young Kim**	165	Fatigue crack growth in consideration of mean stress and damage accumulation
	I	Software Survey Section

NUMBER 2

A. Hobbacher	173	Stress intensity factors of welded joints
T. S. Srivatsan, S. Anand and **J. D. Troxell**	183	High strain cyclic fatigue and fracture of an oxide dispersion strengthened copper alloy
D. Radaj and **S. Zhang**	199	Loading modes and stress intensity factors at rigid layer edges
N. Eswara Prasad, S. V. Kamat, K. S. Prasad, G. Malakondaiah and **V. V. Kutumbarao**	209	In-plane anisotropy in the fracture toughness of an Al–Li 8090 alloy plate
H. Drar and **A. Bergmark**	225	Load rate influence on the fracture morphology of a ductile steel
S. K. Cheong and **O. N. Kwon**	235	Analysis of a crack approaching two circular holes in $[0_n/90_m]_s$ laminates
A. A. Baron	245	A thermodynamic model for fracture toughness prediction
R. H. Dodds, Jr., M. Tang and **T. L. Anderson**	253	Numerical procedures to model ductile crack extension
R. R. Bhargava and **R. Kumar**	265	Dugdale model solution for an infinite plate with a circular arc crack
Y. Z. Chen	275	Numerical solution of a curved crack problem by using hypersingular integral equation approach
Y. W. Shi	285	Prediction of fracture toughness requirement for engineering structures
H. S. Saxena, R. S. Dhaliwal and **J. G. Rokne**	291	Cylindrical interface crack between nonhomogeneous elastic materials under axially symmetric longitudinal shear
Shing-Dar Wang and **Sanboh Lee**	297	Edge dislocation dipoles near a semi-infinite crack tip
Xiangzhou Zhang and **N. Hasebe**	311	Interactions between rectilinear and circumferential cracks
Wang Yuanhan, Liu Zaihua and **Wang Jian**	329	Dynamic fracture analysis of a stiffened panel with an edge crack
Lü Baotong and **Zheng Xiulin**	339	An approach for predicting fatigue crack initiation life of a low alloy steel below room temperature
Zhao Yong, Fang Huacan and **Fan Xiaodong**	347	Slowing down metal fatigue damage with a magnetic field

Technical Note

Y. Z. Chen 353 Single crack problem with polynomial traction on the crack face

I Software Survey Section

NUMBER 3

K. D. Basham, K. P. Chong and A. P. Boresi 357 A new method to compute size independent fracture toughness values for brittle materials

M. Isida and H. Noguchi 365 Arbitrary array of cracks in bonded half planes subjected to various loadings

L. Gambarotta 381 Modeling dilatancy and failure of uniaxially compressed brittle materials by microcrack-weakened solids

Mingzhe Shi and Mingwen Jiang 393 An investigation on the ductile damage evolution law of high-cycle fatigue

J. C. Sung and J. Y. Liou 399 Transient crack growth in a viscoplastic solid

R. C. Batra and J. P. Zhang 413 Analysis of deformations near a crack tip in a compressible nonlinear elastic material

S. K. Maiti, M. R. Shanbhag and K. Eswaran 433 Crack–crack interactions in bimaterials

K. Y. Lam and Cao Wen 443 Enhancement/shielding effects of inclusion on arbitrarily located cracks

D. P. Harvey II, J. B. Terrell, T. S. Sudarshan and M. R. Louthan, Jr. 455 Participation of hydrogen in the impact behavior of 304L stainless steel

Guo Wanlin 465 Elastic–plastic analysis of a finite sheet with a cold-worked hole

Guo Wanlin 473 Stress intensity factors for corner cracks at holes subjected to biaxial and pin loads

D. Z. Feng, K. D. Zhang and G. F. Xu 481 Finite element numerical evaluation of J-integral for cracked ductile cylinders

D. Z. Feng, K. D. Zhang and G. F. Xu 491 The plane strain, work-hardening response of cracked ductile cylinders

J. Chao, J. Fernández-Sáez, J. Durán and J. M. Amo 499 Effect of mechanical heterogeneity on the behavior of a crack in the weld heat affected zone: a numerical analysis

S. Melin	511	Growth from a straight crack subjected to arbitrary remote loading
S. L. Fok and **J. Smart**	519	Discriminating between fracture criteria in the prediction of failure probability of brittle materials
		Technical Note
P. Doig and **R. Moskovic**	529	The influence of competing fracture mode on the ductile to brittle transition temperature
		Letter to the Editor
I. R. Wallhead and **L. Edwards**	537	Comments on "Techniques of optical caustics photography" by D. A. Meyn
		Announcement
	541	Failures '94—Symposium on Risk, Economy and Safety, Failure Minimization and Analysis, Johannesburg, South Africa, 22–24 June 1994
	I	Software Survey Section

NUMBER 4

A. N. Das	543	Extension of a plane crack in a pre-stressed infinite elastic medium
K. Mallick, D. Krajcinovic, D. Sumarac and **M. Vujosevic**	553	Critical state of a two-dimensional elastic continuum containing elliptical voids
Weisheng Lei, Xiangqiao Yan and **Mei Yao**	571	Determination of characteristic transition temperature of low-temperature brittleness in mild steel
Weisheng Lei, Xiangqiao Yan and **Mei Yao**	583	Numerical analysis of strain rate field below notch root of Charpy V-notch test specimen under impact loading condition
Weisheng Lei, Xiangqiao Yan and **Mei Yao**	595	Effect of residual stress on fracture behavior of mild steel
Weisheng Lei, Xiangqiao Yan and **Mei Yao**	601	Ductile/brittle transition condition in Charpy V-notch impact test in structural steel
Ming-Chang Jeng, Ji-Liang Doong and **Wei-Chung Liu**	607	Finite element analysis of crack growth life prediction under complex load history
Y. Wang and **J. G. Williams**	617	Dynamic *G* calculations for an axially loaded parallel strip
D. Gross and **St. Heimer**	633	Crack closure and crack path prediction for curved cracks under thermal load

Ch. Zhang and **D. Gross**	641	Transient elastodynamic analysis of a penny-shaped crack
T. Fett	655	Consideration on set-up and boundary conditions for the determination of mode I and mode II crack opening displacements
G. Alpa and **L. Gambarotta**	663	The elastic crack interaction in modeling materials
Yu Hu, Jian Wang, Chaoxin Zhang, Huiqiang Li and **Xiaoyu Hu**	677	Notch sensitivity of reinforced concrete in fracture tests
C. S. Hong and **S. K. Cheong**	683	Analysis of an anisotropic composite laminate with a part-through crack
J. J. Golecki	693	Numerical evaluation of finite-part singular integrals in crack theory (the linear approximation)
Y. Z. Boutros, G. P. Fiani and **E. S. Looka**	701	A systematic method for computing the minimum free distance of a convolutional code
Kang Yong Lee and **Yong Hoon Jang**	709	Thermal stress analysis of an infinite plate containing a rigid inclusion of arbitrary shape
		Technical Note
H. Wada, M. Seika, C. A. Calder and **T. C. Kennedy**	715	Measurement of impact fracture toughness for PMMA with single-point bending test using an air gun
		Discussion
L. P. Pook	721	Discussion of "An engineering tool for fracture toughness testing" by E. I. Stromswold and D. J. Quesnel
		Reply
E. I. Stromswold and **D. J. Quesnel**	723	Reply to L. P. Pook's discussion of "An engineering tool for fracture toughness testing" by E. I. Stromswold and D. J. Quesnel
		Announcement
	725	Failures '94—Symposium on Risk, Economy and Safety, Failure Minimization and Analysis: Johannesburg, South Africa, 22–24 June 1994
	I	Software Survey Section

NUMBER 5

S. Davidson	727	The linear steady thermoelastic problem for a strip with two collinear cracks parallel to its edges
J. H. Kuang and **L. S. Chen**	735	A displacement extrapolation method for two-dimensional mixed-mode crack problems

H. Gong, K. P. Jen, J. N. Majerus and **S. Santhanam**	743	Analytical/numerical solutions for a single hole-edge crack in a wide plate under pure bending
S. Santhanam, J. N. Majerus, K. P. Jen and **D. S. Karanth**	751	Analytical/numerical solutions for a single hole-edge crack in a narrow plate under pure bending
S. A. Hucker and **T. N. Farris**	763	Modified crack closure method using boundary elements
Hua Zhao	773	An improved probabilistic model of fatigue crack growth
E. Smith	781	The magnitude of J_D for a centre cracked tension panel
M. Yoda and **M. Nagao**	789	Fracture and subcritical growth characteristics of indented cracks in soda-lime glass
Meng Qingchun and **Zhang Xing**	797	Analytical–generalized variational method of solution for delaminations of laminates
G. L. Domani and **J. D. Lee**	807	An investigation of a dynamic crack propagation in a two-dimensional viscoelastic solid
A. N. Das	815	Indentations of an elastic layer by four moving punches
C. Ihara and **Y. Shigeyama**	825	Static fatigue crack propagation behavior of glass in a vacuum
J. De and **B. Patra**	835	Propagation of two collinear Griffith cracks in an orthotropic strip
M. Ichikawa	843	Relationship between Weibull moduli for tensile and bending fracture strength of brittle solids (the case of a three-parameter Weibull distribution)
Yichi Lu and **Kangxian Li**	849	A new model for fatigue crack growth after a single overload
J. R. Yeh	857	Fracture analysis of a stiffened orthotropic sheet
Woei-Shang Ko, Cheng-I Weng and **Tei-Chen Chen**	867	Thermal fracture of an infinite cylinder composed of two materials with and without interfacial thermal resistance
S.-W. Yin	887	A fiber bridging model for the fracture of brittle matrix composites
		Technical Notes
J. L. Bogdanoff	895	On the nonuniqueness of the load wave form in a reaction rate mean fatigue crack growth model
J. L. Bogdanoff	901	On a reaction rate model of mean fatigue

Announcement
907 Failures '94—Symposium on Risk, Economy and Safety, Failure Minimization and Analysis: Johannesburg, South Africa, 22–24 June 1994

NUMBER 6

G. S. Wang 909 The plasticity aspect of fatigue crack growth

Cha'o-Kuang Chen and **Bor-Lih Kuo** 931 Transient thermal contact problem for axial crack in a hollow circular cylinder

O. Jørgensen 945 Delamination vs matrix cracking in layered composites subjected to transverse loading

H. M. Bishop, H. W. Chandler and **J. T. Evans** 955 A model of crack extension from thermal shock by surface contact

G. Agnihotri 963 Elastic–plastic analysis of stress state and spread of plastic zone around single edge-cracked plate by finite element method

Yi-Heng Chen and **N. Hasebe** 983 Properties of eigenfunction expansion form and relative integral for a crack with completely closed surfaces

B. K. Dutta 991 A compatible and complete six-noded element to model singularity

Chien-Chang Lin, Ru-Chu Chu and **Yee-Shown Lin** 1005 A finite element model for single-sided crack patchings

Chunyuan Zhang and **B. L. Karihaloo** 1023 A thermodynamic framework of fracture mechanics

Y. H. Zhang and **L. J. Wang** 1031 Statistical analysis of the surface fatigue crack growth in welded joints

S. V. Torgov 1037 Local weight functions for stress intensity factor evaluation for a surface semi-elliptical crack under polynomial loading

Zhi Kai Guo, A. S. Kobayashi and **N. M. Hawkins** 1041 Further studies on fracture process zone for mode I concrete fracture

Doo-Sung Lee 1051 The effect of edge cracks on the distribution of stress in an elastic strip

G. P. Cherepanov and **A. A. Borzykh** 1059 Brittle fracture of solids caused by intense electron beams

Technical Note

Y. Z. Boutros, G. P. Fiani and **E. S. Looka** 1089 An efficient technique for detecting catastrophic convolutional codes
